As of April 2018, there are over 2,000 games on Roblox. Many of them are "clones" of other players' games made by other players, which can lead to copyright issues if the original creators do not want to share their work. Players may be able to report these games as well as block people who play them from their online profiles or in-game friends list. Some games have caused controversy with their focus on violence, sexuality and racism. However, Roblox staff have stated that the problem lies in the people who play these games, not in the games themselves.

In February 2018, it was reported that a game called "Miner's Haven" has been criticized by Roblox users for having a suicide feature where players would have the option of killing themselves when their health reached zero. The players who played this game received a message from the developer named Master Zen said that he was working on an update that removed this feature. The update was released in March 2018 and it included an anti-suicide feature where the health would reset to 100 instead of 0. However, the developer confirmed that he would "still allow players to commit suicide if they are in the mood". To make up for this issue, Master Zen released a series of development updates that included fixing bugs and adding new features to "Miner's Haven".

On March 13th, 2019, ROBLOX announced that they were working on a new anti-fraud system called "Real Account Verification." This system verifies account information by sending a link from one of their partners to the user's email address. For this new security feature, ROBLOX will be using the services of Verified Identity Partners. The system is expected to be completed in late 2019. [30]
